1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 1573969; 8/28/80). GB '969 teaches or suggests an intermittent injection aerosol product. GB '969 does not teach the instant ratio of injection time to stop time. One having ordinary skill in the art would have been expected to determine the optimum ratio through routine experimentation. One would have been motivated to this in order to develop an invention that would have been most effective.
